Second-year Information Systems student at President University specializing in Data Science, with hands-on experience building machine learning forecasting models and AI-driven dashboards using Python and SQL. Seeking an AI Engineering Internship to contribute to innovative, technology-powered solutions.

EDUCATION

President University - B.S. Information Systems (Data Science)

Expected Aug 2027

GPA: 3.59/4.00 • Coursework: Data Structures, Algorithms, OOP, Databases, Web Development

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL, PHP, Dart

Frameworks/Libraries: NumPy, Pandas, scikit-learn, Plotly, FastAPI, Django, Laravel, Bootstrap, Flutter

Tools/Databases: VS Code, Google Colab, Orange, MySQL, PostgreSQL, pgAdmin4

PROJECTS

DVD Rental Analytics Dashboard with AI Forecasting & Chat

Feb – May 2026

Python, FastAPI, scikit-learn, PostgreSQL, Plotly

- Built a full-stack analytics dashboard visualizing rental/revenue data via FastAPI + Plotly, with a Linear Regression forecasting model (seasonal detection, R^2 scoring) to predict future revenue.
- Integrated an AI chat feature (DeepSeek LLM) for natural-language data Q&A and live dashboard actions, plus a local Hugging Face Transformer for zero-shot business-insight classification.

CargoOptima - Fleet Space Optimization

Jun – Aug 2026

JavaScript, Three.js, Node.js/Express, PostgreSQL (Supabase)

- Built a browser-based 3D bin-packing engine that packs items into truck space using 6 rotational orientations with support/adjacency constraints, plus a multi-fleet cost optimizer that cut computation from tens of seconds to under 3 seconds on 250-item datasets.
- Implemented an interactive Three.js simulator with real-time rotation, hover tooltips, and a step-by-step loading-sequence animation; shipped a companion REST API for fleet data management.

FindMyClass - Campus Classroom Finder

Sep – Dec 2025

Dart, Flutter, Python, PHP, MySQL

- Designed the MySQL database (schema, table relationships) for classrooms, buildings, users, and schedules; integrated it with the app and supported AI-assistant scheduling/reminder features.

PreuTix - Event Advertisement Web Application

Feb – May 2025

PHP, MySQL, XAMPP

- Built a full-stack web app for advertising campus events with secure login, image upload, input validation, and an auto-generated invoice feature.

AQUANOMIC - Digital Marketing Platform

Jun – Jul 2025

WordPress

- Co-developed a platform helping fishermen and fish farmers in Muara Gembong market products online; served as SQA Lead and delivered digital marketing training to expand market reach.

LEADERSHIP & ORGANIZATIONAL EXPERIENCE

Chairperson - KMB Ashokavardhana, President University

Dec 2025 – Present

- Direct organization-wide strategy, event planning, and team coordination across multiple committees.

Head of Division - PUMA Information Systems

Sep 2025 – Aug 2026

- Lead the Creative & Student Activity Affairs division, overseeing major events (TechSprint, IStrumental) and cross-divisional coordination.
